

We are opposed to the FCC plan to do away with media ownership caps. It will not promote competition, diversity or localism in today's media market, but rather do just the opposite. It will cause an orgy of mergers and allow a few mega companies to dominate the media and foster their viewpoints while stifling the broad views of the many. The biggest firms will profit without concern for the common good (evidenced by all the scandals on wall street). We hope you will listen to the ones who constantly are the target of slanted views and faulty reporting. In a democracy the press and airwaves belong to the people and cannot be put in the hands of a few.
